

Apurv Singhal

Senior Platform & Cloud DevOps Engineer · Azure · Observability · Infrastructure as Code

Melbourne, Victoria, Australia • Full Australian Working Rights • me@apurvsinghal.com • [apurvsinghal.com](#) • [admguard.com.au](#) • [linkedin.com/in/apurvsinghal28](#) • [github.com/apurvsinghal](#)

EXECUTIVE SUMMARY

Platform and cloud DevOps engineer with 8+ years building and running mission-critical systems for enterprise clients including Bank of Queensland (BOQ), AGIG, Toyota Australia, EPA Victoria and HPCA. Currently Lead Consultant at Capgemini and founder of ADM Guard. Track record in zero-downtime platform migrations, Infrastructure as Code, CI/CD automation, full-stack observability and cloud cost optimisation.

TECHNICAL COMPETENCIES & TOOLING

 Azure Cloud & DevOps Microsoft Azure · Azure Integration Services (APIM, Logic Apps) · Azure Container Apps & Tanzu · Azure DevOps & GitHub Actions CI/CD · Terraform & Bicep IaC · Full-Stack Observability (Dynatrace, New Relic, NRQL) · Docker & Microservices · Azure Functions · Cosmos DB & Azure SQL	 Platform Engineering Enterprise Platform Migrations · Release Engineering & CI/CD Automation · Quality Gates & Branching Strategy · Cloud Cost Governance & FinOps · Site Reliability & Disaster Recovery · Zero-Trust & Policy-as-Code · Internal Developer Platforms & Golden Paths
 Applied AI & Engineering Azure AI Foundry & Azure OpenAI · Claude API & Agent Architectures · RAG Workflows · TypeScript & Next.js · Python & FastAPI · C# & .NET Core	 Governance & Security Azure Policy Guardrails & RBAC · SAST & DevSecOps · Zero-PII Ingestion Design · Australian Privacy Act APP 1.7–1.9 · Immutable Azure WORM Storage

ENTERPRISE PLATFORM EXPERIENCE

Capgemini Lead Consultant · Cloud & Platforms Practice <i>Delivered across multiple client engagements, some concurrent.</i>	2021 — Present Melbourne, Australia
Client: Bank of Queensland (BOQ) — Platform Engineer (Observability) - Leading enterprise Dynatrace full-stack observability implementation across banking cloud and platform infrastructure, monitoring 10,000+ microservices and endpoints across multi-cloud environments and enterprise data centers. - Architecting distributed tracing, custom service dashboards, synthetic transaction monitors, and Davis AI anomaly alert policies to accelerate incident triage and reduce MTTD/MTTR. - Partnering with platform and engineering squads to embed observability standards into CI/CD pipelines, automating monitoring agent deployments and reliability guardrails.	Aug 2026 — Present
Client: Australian Gas Infrastructure Group (AGIG) — Lead Cloud DevOps Engineer - Led Azure DevOps architecture for migrating 100+ Azure resources and 1,000+ integrations to Azure Integration Services (APIM, Logic Apps, Functions) with zero downtime. Modular YAML release templates with automated rollback delivered a more robust platform, fewer deployment errors and faster integration response times. - Standardised automated release workflows and rollback capabilities across all migration phases. - Enforced DevSecOps guardrails, automated SAST scanning, and Azure RBAC/IaC governance to maintain platform compliance and stability.	Feb 2026 — Aug 2026
Client: HPCA — DevOps & Release Engineering Lead - Built automated CI/CD release pipelines on Azure DevOps and Git, removing manual deployment steps across release cycles. - Set up standardised branching strategies, automated quality gates and deployment runbooks, and led delivery pods on release practices.	Jun 2025 — Present
Client: EPA Victoria — Senior DevOps Engineer (IaC & Integration) - Architected end-to-end Infrastructure as Code modules using Terraform and ARM for Azure Integration Services (APIM, Logic Apps, Azure Functions), cutting environment provisioning time from days to under 30 minutes. - Designed reusable Azure DevOps YAML pipelines for integration workloads, driving zero-downtime cutovers and environment configuration parity. - Served as Azure DevOps SME, enforcing enterprise-wide CI/CD templates, Azure Policy security guardrails, and compliance baselines.	May 2025 — Jan 2026
Client: Toyota Australia — Platform Engineer - Cut Azure operational spend by ~50% by re-architecting resource allocation, autoscaling and monitoring policies, while maintaining performance across containerised API workloads. - Transitioned legacy VMware Tanzu container workloads to Azure Container Apps, modernising containerised API delivery and developer platform velocity. - Built hybrid-environment observability on New Relic One (APM agents, distributed tracing, custom NRQL dashboards, synthetic monitors) to speed up incident detection and resolution across the API platform. - Authored standardised Azure DevOps YAML CI/CD pipelines, reusable Terraform/Bicep IaC modules, and cloud governance frameworks.	Jun 2021 — May 2025

PRIOR PROFESSIONAL EXPERIENCE

- Willow.ai — Software Developer

May 2020 — Jun 2021 | New Delhi, India

 - Engineered scalable .NET microservices and RESTful APIs for smart building and digital twin platforms, improving end-to-end API response times by ~35% by diagnosing backend bottlenecks.
 - Introduced early CI/CD pipeline automation and developer enablement tooling to reduce deployment friction.
- TechCompiler Data Systems — Software Developer

Jul 2018 — Feb 2020 | New Delhi, India

 - Built and maintained RESTful APIs and backend microservices using .NET, C# and relational databases, with automated build and test checks for reliable releases.
 - Refactored complex SQL schemas, stored procedures and data pipelines, cutting query latency by ~50%.

FEATURED VENTURE

ADM Guard

Founder & System Architect

admguard.com.au

2024 — Present

The compliance flight recorder for automated decision-making systems (APP 1.7–1.9).

- Architected a zero-PII ingestion boundary that rejects sensitive personal data at runtime before persistence (HTTP 422).
- Implemented SHA-256 Merkle hash chains anchored to Azure Australia East WORM (Write-Once-Read-Many) immutable storage.
- Built drop-in client SDKs (TypeScript, Python) with idempotency-key retry safety to give Australian SaaS immutable audit readiness.

SELECTED PROJECTS

Personal Site & AI Assistant — apurvsinghal.com

Built a Next.js/TypeScript portfolio hosted on Azure Static Web Apps, with an AI assistant that answers questions from my own content using RAG, Azure AI Foundry and the Claude API.

COMMUNITY LEADERSHIP

- IndianCare Inc. — Head of IT (Volunteer)

Apr 2026 — Present | Melbourne, Australia

 - Directing end-to-end IT operations, cloud administration and digital strategy for a registered Victorian community welfare non-profit.
 - Managing Microsoft 365, Entra ID identity governance, MFA policies and endpoint security standards that protect confidential helpline, counselling and welfare workflows.

EDUCATION & CREDENTIALS

Bachelor of Technology in Computer Science & Engineering — Guru Gobind Singh Indraprastha University (GGSIPU)

2014 — 2018

Credentials: Microsoft Azure Applied Skills
